

## POKE BOWLS

Poke ("POH-keh") means to slice or cut in Hawaiian and refers to chunks of raw fish - usually tuna or salmon which is marinated in umami-packed sauces, with sesame seeds, tossed over rice and topped with fresh vegetables such as edamame beans, bay radish, carrot, cucumber, mangetout, avocado & red cabbage.

## ABALONE

Abalones are marine molluscs known for their strikingly iridescent, spiral-shaped shells. These shells are often characterised by shimmering colours like blues, greens, and pinks, which make them highly sought after for their aesthetic appeal. Abalones are herbivorous creatures that cling to rocks in coastal areas, using a strong, muscular foot to move and feed on algae.

They are known for their resilience, as they withstand the pounding waves and changing tides. The interior of their shells is smooth and mother-of-pearl-like, and these shells have been used in jewellery and decorative art for centuries.
