PRIVATE GAME RESERVE

waterberg ■■■ south africa

Dear Guest,

Welcome to Izintaba! We hope you have a relaxing stay in the Waterberg bushveld.

When walking, cycling or driving on the reserve you will have sightings of various animals and flora.

Should you encounter something interesting or unusual, an injured, sick or dead animal, newborns or an uncommon bird sighting, we would really like to hear about it. For example, rare sightings of free roaming wild dogs, spotted hyaena and cheetah have been reported on a few occasions in the area and on our farm, as well as vultures and redbilled oxpeckers which, were re- introduced a few years ago. All of these are monitored by wildlife interest groups and every sighting is important.

Your observations can better help to manage our environment. If possible, try to pinpoint the location of what you saw on the map.

Your help is very much appreciated.
