

WINE LIST

Silver Star Wine List SA

What is wine?

In short, wine is fermented grape juice. It is complex and beautiful; it is a moment captured in a bottle. Wine is a living organism; it gets better with time.

The matrimony between food and wine is not about the perfect technical pairing, but rather finding a match that is palatable for you.

- *Tannin is the dry, bitter, furry mouth-coating sensation. They come from grape skins, stems, and pips also from oak barrels. Tannins gives body to red wines and is also excellent ageing agent.*
- *Acidity balances all different flavours of any wine. When it comes to pairing acidity must be taken into consideration.*
- *Salt enhances flavours of food as well for the wine. Too salty dish will destroy a wine.*
- *Sweetness in food may be controlled by the acidity and alcohol levels of the wine.*

Proverb: Wine is the second sauce of the dish. (Germain Lehodey)

Red Wine

Merlot

Merlot is a dark blue-coloured wine grape variety, that is used as both a blending grape and for varietal wines. The name Merlot is thought to be a diminutive of merle, the French name for the blackbird, probably a reference to the colour of the grape. Its softness and "fleshiness", combined with its earlier ripening, makes Merlot a popular grape for blending with the sterner, later-ripening Cabernet Sauvignon, which tends to be higher in tannin.

Cabernet Franc

Cabernet Franc is believed to have been established in the Libournais region of southwest France sometime in the 17th century when Cardinal Richelieu transported cuttings of the vine to the Loire Valley. They were planted at the Abbey of Bourgueil under the care of an abbot named Breton, whose name became associated with the grape. By the 18th century, plantings of Cabernet Franc (known as Bouchet) were found throughout Fronsac, Pomerol and St-Emilion, making quality wines.

Red Blends

Since winemaking is an art, the act of blending is what allows the winemakers to express their talent and signature. Heavy wines can be softened by blending with a more elegant variety; while delicate, or even boring wines, can be given strength and body through the addition of a more substantial variety. Indeed, blends are some of the most complex and interesting wines to be enjoyed. Red wine blends can be found in all the wine regions of the world.
