AN ENDURING COMMITMENT TO safeguarding Africa's wildlife & wilderness

Singita is a conservation and ecotourism brand that has been helping to preserve Africa's untouched natural spaces for almost three decades and we offer guests exceptional safari experiences at 16 award-winning lodges and camps across four countries.

In partnership with non-profit Funds & Trusts who implement strategic conservation projects in each of the regions in which we operate, our 100-year purpose is to preserve and protect large parts of African wilderness for future generations.

We are steadfast in our commitment to protect unique ecosystems, help recover critically endangered species and ensure no further extinction, benefit neighbouring communities under our care, and contribute positively to the reduction of GHG emissions through our climate commitments.

Travellers choose to stay at Singita because of the expansive space and beauty of our remote locations. They value the restorative serenity of these pristine wilderness areas, as well as the limited guest and vehicle numbers, extraordinarily consistent game viewing and exceptional & intuitive care that is taken of each guest during their stay. When they depart, they are transformed for life and deeply moved by their connection and contribution to the legacy of this continent.

“Singita’s ethos of ‘touching the Earth lightly’ is no longer just a forward-thinking principle; it is imperative to our survival, and that of the land, wildlife and communities under our care.”

Weather and temperature

BEST TIME TO GO ON SAFARI

Southern Africa is a year-round destination. Traditionally the dry winter months (April to October) are best for game viewing, due to the shorter grass, lack of foliage and the absence of water which forces the game to concentrate around the remaining sources of drinking water. Annual rainfall, usually in the form of short afternoon thunder showers that clear up within an hour, occur from December to March. Many species give birth to their young around the start of the rainy season which is when the the bush comes alive with newborn animals.
